

Leading Teams with Emotional Intelligence

Length: 2 Days
PDUs: 14

Learning Objectives:

- Leverage emotions to excel as a project team leaders
- Understand PMI's research on PM Success
- Recognize strengths and weaknesses in leadership and emotional intelligence
- Learn the 15 competencies linked to leadership and PM success
- Develop proficiency in those emotional competencies most important to project management success
- Use your emotional intelligence to create a positive team environment

Who Should Attend:

- Project Managers
- Emerging Project Leaders
- Functional or department managers
- Others who want to improve as a leader

Overview:

Leading Teams with Emotional Intelligence is a highly interactive workshop designed to teach advanced emotional intelligence techniques to project managers, project leaders and others who lead teams.

Participants will learn about research into effective leadership as well as recent PMI research into what makes project managers successful. Participants will have several opportunities to assess their own styles and strengths and weaknesses for specific leadership competencies.

Participants will work in small teams to complete exercises and discussion topics and to learn from each other.

Each attendee will receive a copy of *Emotional Intelligence for Project Managers; the People Skills You Need to Succeed*.
